## DETAILED ACTION

### *Election/Restrictions*

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-26, drawn to a magnetic separator, classified in class 209, subclass 215.
- II. Claims 27-35, drawn to a method for linearly dispersing charged particles, classified in class 209, subclass 213.

Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case, the process of the claims 27-35 can be practiced by another materially different apparatus, for example, a mass spectrometer as disclosed in US Patent No. 6,182,831.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Art Unit: 3653
